

**2009-2010 LU CYCLE DESCRIPTIONS – GRADES 3 to 6
PLEASE COMPLETE AND RETURN THIS FORM BY
TUESDAY, SEPTEMBER 1**

Identify your 1st, 2nd, 3rd, and 4th choices below. Cycles are assigned according to interest, availability and class performance. Each cycle is interdisciplinary and includes areas of math, science, language arts, and social studies with an emphasis on critical and creative problem solving.

_____ **Cycle I: TOYS IN SPACE**

Weightlessness has always been a fascinating part of space travel. Join us on this investigation of the effects of microgravity on popular toys and games. It's out of this world!

_____ **Cycle II: PAINT-A-POEM**

Silly, gross, or sweet - it's all poetry! Read poems, write poems, illustrate poems, and act out poems while you learn different forms and styles of poetry. Using varied artistic styles and materials, express your poem through visual mediums.

_____ **Cycle III: AROUND THE WORLD IN 43 DAYS**

Experience a grand tour of the world while we study the continents of this earth. Learn how to read and use different types of maps. Take advantage of this independent study cycle while you investigate the geography of a country or region.

_____ **Cycle IV: CREEPY CRAWLY CRITTERS**

Go **BUGGY** with us as we study different types of insects. We will investigate their physical make up, environment, and function. It may make you think a moment before you squash one.

_____ Please write the ideal number of cycles you would like to attend this year.
