

Uploading Photos from a Digital Camera

1. Plug the digital camera into a USB port on the computer (on some computers, the USB ports are only on the back).
2. Turn on the camera. This window will appear:

3. Click OK (make sure that "Copy Pictures to a folder on my computer Using Microsoft Scanner and Camera Wizard" is selected)
4. Click NEXT.
5. A window will appear showing you thumbnails of all of the pictures on your camera. They are **all** selected. If you wish to deselect any, check the little box in the upper right-hand corner of the picture to "uncheck" it. You also have the option to "clear all" which makes it easy to select only a few pictures.

6. Once you have made your selections, click NEXT.
7. Your pictures will automatically go into the "MY PICTURES" folder.
8. In step 1, type in a name for the group of pictures.
9. Click NEXT.
10. Your pictures will copy, then click NEXT.
11. Click FINISH.
12. The "MY PICTURES" folder will open.
13. Your pictures are ready to be printed, inserted, or uploaded into another program or online photo service.
